

NEOCEUTICALS

Neokay Drops (Vitamin K)

Product Information

What is NeoKay ?

Neokay is a nutritional supplement that has been specially developed to provide vitamin K. Vitamin K plays an important role in the coagulation of blood. Because breast milk contains too little vitamin K, nursing babies who are wholly or largely breast-fed require extra vitamin K for the first three months of their lives.

Especially for babies, NeoKay has:

The characteristics of providing vitamin K in amounts comparable to formula feed milk products, for proper coagulation of blood.

Available in oil (25 ml)

Each daily dose of NeoKay contains:

0.25ml = 50 µg vitamin K dissolved in a pure fraction of coconut oil with vitamin E as antioxidant.

VITAMINS		RDA*
K	50 µg	n/a
E	125 µg	ca 1%

* = Recommended Daily Amount.

n/a No official RDA

Recommended Daily Use

0.25ml dropwise, each day
Children who are wholly or largely fed with breast milk should receive vitamin K on the second day following birth until and including the third month of their lives.

Method of Use

Squeeze the bulb of the teat pipette and draw up the liquid to the 0.25ml mark and then administer to the child. Upon administration, avoid contact of the dropper with the mouth or food. Saliva and food can contaminate the content of the bottle.

Do not exceed the recommended use.

Storage

Store in a cool and dark place (not in the refrigerator), keep out of the reach and sight of children.
